

THE WORLD BANK

WORKSHOP ON TECHNOLOGY IN PUBLIC PROCUREMENT

Technology plays a crucial role in public procurement, revolutionizing the way governments and public organizations conduct their procurement processes. By leveraging technology, public procurement processes become more efficient, transparent, and cost-effective.

Based on demand from project implementing agencies, the World Bank is hosting an event about the use of Technology in Public Procurement. Senior officials from government, multilateral and bilateral organizations, and other subject experts would interact on a variety of technological interventions in public procurement during this event.
